CAREER OBJECTIVE

Software Engineer specialising in designing High Availability systems and enterprise integrations. Transitioning into Solutions Architecture with a focus on orchestrating high-level software design. Expert at bridging the gap between complex technical requirements and successful business delivery across many industries.

EXPERIENCE

Dimension Software

Auckland, New Zealand

Software Engineer

April 2025 – Present

- Designed, built and deployed several on-premises software solutions using IIS, Windows Services and load balancers to meet HA requirements in DEV, TEST and PROD environments
- Exposure to many aspects of business operation such as SoWs, RFPs, Quotation, As-Built documentation, QRGs, support desks, project management tools
- Developed a proof-of-concept mobile app for offline data entry using React Native
- Providing extensive support internally and externally performing RCA and resolving complex issues with software and networks, becoming the go-to for solving weird problems quickly
- Reverse engineering applications to help provide detailed and actionable bug reports to our software developers
- Prototyped integrations with SharePoint/Graph API, PowerBI, Microsoft SSO and digital signatures
- Providing training for clients, partners and graduates

Graduate Software Engineer

April 2024 - April 2025

- Hands-on experience leading projects, working with external project managers and QA processes to deliver solutions
- Putting together advanced KPI displays using time series data, event frames, SQL data and manual data entry
- Made changes in production systems for clients, creating RFCs for CAB approval
- Extensive use of business applications such as AVEVA PI, A&E systems, SCADA systems and Alarm Databases. Using Service Now to request access and resources in several different companies
- Exposure to Power, Water, Mining, Oil and Gas, Manufacturing and Pharmaceutical industries

Burger Fuel Ellerslie

Auckland, New Zealand

Team Member

Aug. 2023 – April 2024

- Honed my customer service skills engaging with a diverse customer base and providing top-notch service.
- Worked as part of a complex and time pressured system, learning strong teamwork skills to keep the burgers coming during a rush.

EDUCATION

University of Auckland

Auckland, NZ

Bachelor of Science in Computer Science and Mathematics

2020 – 2022

PROJECTS

AVAILABLE ON GITHUB

shaderbg | Rust

- Developed a cross-platform application using Rust
- Designed a configurable rendering system for building scenes using WebGPU
- Focus on being lightweight

solitaire | C, Raylib, Emscripten

- Developed a solitaire game in C using Raylib
- Used Emscripten to build a WASM port that runs in the browser
- Implemented features such as animations, leaderboard and a card texture pack system

TECHNICAL SKILLS

High-level: Agile, Algorithms, Debugging, Problem Solving, Reverse Engineering, Solutions Architecture

Languages: C/C++, C#, TypeScript, HTML/CSS, Python, PowerShell, Rust, Zig, Java, Transact-SQL, IL/Assembly

Frameworks: Angular, React, React Native, .NET, ASP.NET, Node, Vite, IIS

Developer Tools: Git, Docker, VS Code, Visual Studio, NPM/Bun, CMake, AWS, Jira

Technologies: HTTP, SSL, Networking, REST APIs, SSO/OAuth, RDP, Windows Services, HA, VMs
